

	Terms	Charge
Volume fee	The volume fee is calculated on the basis of the natural gas volume (expressed in kWh) measured at the domestic and cross-border exit points (excluding blending circle and storage exit points) and allocated by the relevant TSO.	42.04 HUF/MWh
Odourization fee	The odourization fee shall be paid by the network user for the natural gas odourization activity provided by the TSO at domestic exit points (excluding blending circle and storage exit points).	5997.50 HUF/I
Title transfer services	A network user (seller) may transfer the right of use of the natural gas to another network user (buyer) specified by the seller at a given physical or virtual point (MGP, Magyar Gázkegyenlítési Pont) of the natural gas transmission system. The title transfer fee is paid by the seller.	At physical network point: 9.743 HUF/MWh At virtual network point: 4.872 HUF/MWh
Capacity overrun surcharge	If the network user exceeds the booked and available hourly capacity at any entry/exit network points with more than 1%, capacity overrun surcharge or additional capacity fee shall be paid to the TSO for each entry/exit network point.	The sum of the capacity overrun surcharge is 4 times the yearly capacity fee of the largest amount of additional hourly capacity used unauthorised on gasday(s) with average temperature of -12 °C or higher, within
Nomination difference surcharge	If the absolute value of the difference between the nominated and allocated quantities is higher than 14% of the nominated quantity, the network user shall pay surcharge for the quantity above the tolerance level.	0.0975 HUF/kWh
