

	Terms	Charge
<b>Volume fee</b>	The volume fee is calculated on the basis of the natural gas volume (expressed in kWh) measured at the domestic and cross-border exit points (excluding blending circle and storage exit points) and allocated by the relevant TSO.	42,04 HUF/MWh
<b>Odourization fee</b>	The odourization fee shall be paid by the network user for the natural gas odourization activity provided by the TSO at domestic exit points (excluding blending circle and storage exit points).	5997,50 HUF/l
<b>Title transfer services</b>	A network user (seller) may transfer the right of use of the natural gas to another network user (buyer) specified by the seller at a given physical or virtual point (MGP, Magyar Gázkiegynélítési Pont) of the natural gas transmission system. The title transfer fee is paid by the seller.	At physical points: 9,743 HUF/MWh At virtual points: 4,872 HUF/MWh
<b>Capacity overrun surcharge</b>	If the network user exceeds the booked and available hourly capacity at any entry/exit network points with more than 1%, capacity overrun surcharge or additional capacity fee shall be paid to the TSO for each entry/exit network point.	The sum of the capacity overrun surcharge is 4 times the yearly capacity fee of the largest amount of additional hourly capacity used unauthorised on gasday(s) with average temperature of -12 °C or higher, within
<b>Nomination difference surcharge</b>	If the absolute value of the difference between the nominated and allocated quantities is higher than 14% of the nominated quantity, the network user shall pay surcharge for the quantity above the tolerance level.	0,0975 HUF/kWh
<b>Balancing surcharge</b>	The surcharge shall be paid by network users that are not members of any trading platforms. If the amount of balancing natural gas used by the network user exceeds the $\pm 2\%$ tolerance level (as over- or underconsumption), the network user shall pay the balancing surcharge for the quantity above the tolerance level.	0,1624 HUF/kWh
