

Hungarian – Slovenian hydrogen corridor

AIM OF THE PROJECT

Establishment of 30 GWh/d HU>SI and 30 SI>HU firm capacity, the project as part of the European Hydrogen Backbone Network (EHB) will ensure the capacity demand of domestic and regional producers and consumers connected to the backbone network.

SCOPE OF THE PROJECT

Construction of a 201 km DN600, PN75 bar new hydrogen pipeline between the SI/HU border and Ósi. Establishment of a border measuring station at Tornyiszentmiklós. Construction of new hydrogen transport compressor stations at Nagykanizsa. The project is connected to the HU/SK hydrogen corridor.

STATUS OF THE PROJECT IN THE HUNGARIAN TYNDP

The project is part of the 2022 10-year Development Plan and is also included in the 2023 10-year Development Proposal, which was submitted to the MEKH.

The proposed implementation date is 31.12.2035.
